Designing Safe Road Systems: A Human Factors Perspective (Human Factors in Road and Rail Transport) Jan Theeuwes, Richard van der Horst

Many books focus on individual differences and how those relate to traffic safety such as accident proneness, gender differences, age, alcohol, and the effects of drugs. Others focus on the safety effects regarding the vehicle such as airbags, anti-lock brakes, navigation systems, intelligent cruise control and other new gadgets coming to the vehicle. Even though these topics are undoubtedly important for traffic safety, this book takes a unique approach as it focuses solely on the road environment. Designing Safe Road Systems provides the background for those who want to know more about the effects of road design on driving behaviour. It uses a systems approach to allow a better understanding of why and in what circumstances drivers may commit errors. This understanding will ultimately lead to road systems that prevent (fatal) errors from occurring. The book contains an overview of the current models and theories about human performance and human behaviour in traffic that are relevant for all those involved in designing safe road systems. The central theme of this book is how design principles can reduce the probability of an error while driving. The authors demonstrate how knowledge of human factors helps a road authority to better understand how road users behave. They argue that in many cases the design of the environment can be further adjusted to human capabilities, and that safety should be considered a system property to be built into the road system.

From reader reviews:

Louis Trent:

This Designing Safe Road Systems: A Human Factors Perspective (Human Factors in Road and Rail Transport) book is not ordinary book, you have after that it the world is in your hands. The benefit you will get by reading this book is actually information inside this book incredible fresh, you will get information which is getting deeper anyone read a lot of information you will get. This particular Designing Safe Road Systems: A Human Factors Perspective (Human Factors in Road and Rail Transport) without we comprehend teach the one who looking at it become critical in imagining and analyzing. Don't end up being worry Designing Safe Road Systems: A Human Factors Perspective (Human Factors in Road and Rail Transport) can bring once you are and not make your tote space or bookshelves' grow to be full because you can have it within your lovely laptop even cell phone. This Designing Safe Road Systems: A Human Factors Perspective (Human Factors in Road and Rail Transport) having good arrangement in word and layout, so you will not sense uninterested in reading.

Michael Hilton:

Now a day people that Living in the era where everything reachable by connect to the internet and the resources inside can be true or not involve people to be aware of each info they get. How individuals to be smart in obtaining any information nowadays? Of course the answer then is reading a book. Reading through a book can help individuals out of this uncertainty Information mainly this Designing Safe Road Systems: A Human Factors Perspective (Human Factors in Road and Rail Transport) book as this book offers you rich data and knowledge. Of course the information in this book hundred % guarantees there is no doubt in it as you know.

Rebecca Muldoon:

The actual book Designing Safe Road Systems: A Human Factors Perspective (Human Factors in Road and Rail Transport) has a lot associated with on it. So when you check out this book you can get a lot of advantage. The book was compiled by the very famous author. This articles author makes some research before write this book. This specific book very easy to read you may get the point easily after perusing this book.

Donald Goodman:

As a college student exactly feel bored to reading. If their teacher questioned them to go to the library or make summary for some book, they are complained. Just very little students that has reading's heart and soul or real their leisure activity. They just do what the trainer want, like asked to the library. They go to right now there but nothing reading significantly. Any students feel that reading through is not important, boring in addition to can't see colorful photos on there. Yeah, it is to get complicated. Book is very important to suit your needs. As we know that on this era, many ways to get whatever we would like. Likewise word says,

ways to reach Chinese's country. Therefore this Designing Safe Road Systems: A Human Factors Perspective (Human Factors in Road and Rail Transport) can make you sense more interested to read.
