## **The Geometry of Information Retrieval** C. J. van Rijsbergen

Information retrieval, IR, the science of extracting information from any potential source, can be viewed in a number of ways: logical, probabilistic and vector space models are some of the most important. In this book, the author, one of the leading researchers in the area, shows how these views can be reforged in the same framework used to formulate the general principles of quantum mechanics. All the usual quantum-mechanical notions have their IR-theoretic analogues, and the standard results can be applied to address problems in IR, such as pseudo-relevance feedback, relevance feedback and ostensive retrieval. The relation with quantum computing is also examined. To keep the book self-contained appendices with background material on physics and mathematics are included. Each chapter ends with bibliographic remarks that point to further reading. This is an important, ground-breaking book, with much new material, for all those working in IR, AI and natural language processing.

### **From reader reviews:**

#### **Brian Lowe:**

The book The Geometry of Information Retrieval can give more knowledge and also the precise product information about everything you want. Why then must we leave the best thing like a book The Geometry of Information Retrieval? Some of you have a different opinion about book. But one aim this book can give many details for us. It is absolutely appropriate. Right now, try to closer along with your book. Knowledge or info that you take for that, you could give for each other; you may share all of these. Book The Geometry of Information Retrieval has simple shape however you know: it has great and large function for you. You can search the enormous world by open up and read a guide. So it is very wonderful.

#### **Robert Heck:**

Now a day people who Living in the era everywhere everything reachable by interact with the internet and the resources within it can be true or not require people to be aware of each facts they get. How many people to be smart in receiving any information nowadays? Of course the answer then is reading a book. Examining a book can help people out of this uncertainty Information mainly this The Geometry of Information Retrieval book because this book offers you rich facts and knowledge. Of course the data in this book hundred pct guarantees there is no doubt in it everybody knows.

#### **Eugene Hughes:**

Reading a book being new life style in this season; every people loves to study a book. When you study a book you can get a lots of benefit. When you read textbooks, you can improve your knowledge, since book has a lot of information in it. The information that you will get depend on what kinds of book that you have read. In order to get information about your research, you can read education books, but if you want to entertain yourself you can read a fiction books, such us novel, comics, in addition to soon. The The Geometry of Information Retrieval will give you a new experience in reading a book.

#### **Jackie Armstrong:**

A lot of e-book has printed but it differs from the others. You can get it by net on social media. You can choose the top book for you, science, comedian, novel, or whatever by simply searching from it. It is identified as of book The Geometry of Information Retrieval. You can include your knowledge by it. Without departing the printed book, it might add your knowledge and make an individual happier to read. It is most significant that, you must aware about reserve. It can bring you from one location to other place.
