Green Solvents I: Properties and Applications in Chemistry

Green Solvents I: Properties and Applications in Chemistry

The conventional solvents used in chemical, pharmaceutical, biomedical and separation processes represent a great challenge to green chemistry because of their toxicity and flammability. Since the beginning of “the 12 Principles of Green Chemistry” in 1998, a general effort has been made to replace conventional solvents with environmentally benign substitutes. Water has been the most popular choice so far, followed by ionic liquids, surfactant, supercritical fluids, fluorous solvents, liquid polymers, bio-solvents and switchable solvent systems.

Green Solvents Volume I and II provides a throughout overview of the different types of solvents and discusses their extensive applications in fields such as extraction, organic synthesis, biocatalytic processes, production of fine chemicals, removal of hydrogen sulphide, biochemical transformations, composite material, energy storage devices and polymers. These volumes are written by leading international experts and cover all possible aspects of green solvents’ properties and applications available in today’s literature.

Green Solvents Volume I and II is an invaluable guide to scientists, R&D industrial specialists, researchers, upper-level undergraduates and graduate students, Ph.D. scholars, college and university professors working in the field of chemistry and biochemistry.

From reader reviews:

Delores Breedlove:

In this 21st century, people become competitive in each way. By being competitive currently, people have to do something to make these individuals survive, being in the middle of the actual crowded place and notice simply by surrounding. One thing that oftentimes many people have underestimated the item for a while is reading. Yes, by reading a reserve your ability to survive enhance then having chance to stay than other is high. To suit your needs who want to start reading a new book, we give you this Green Solvents I: Properties and Applications in Chemistry book as beginner and daily reading book. Why, because this book is more than just a book.

Gregg Spencer:

As people who live in typically the modest era should be upgrade about what going on or info even knowledge to make all of them keep up with the era that is always change and move forward. Some of you maybe will probably update themselves by reading books. It is a good choice for yourself but the problems coming to an individual is you don't know which one you should start with. This Green Solvents I: Properties and Applications in Chemistry is our recommendation to make you keep up with the world. Why, since this book serves what you want and want in this era.

Jennifer Lorenzo:

A lot of people always spent their particular free time to vacation or maybe go to the outside with them loved ones or their friend. Are you aware? Many a lot of people spent these people free time just watching TV, or maybe playing video games all day long. If you need to try to find a new activity this is look different you can read a new book. It is really fun for you personally. If you enjoy the book which you read you can spent the whole day to reading a publication. The book Green Solvents I: Properties and Applications in Chemistry it is rather good to read. There are a lot of people who recommended this book. These folks were enjoying reading this book. If you did not have enough space to create this book you can buy typically the e-book. You can more very easily to read this book from your smart phone. The price is not very costly but this book possesses high quality.

Keith Kuhlman:

People live in this new day of lifestyle always attempt to and must have the extra time or they will get great deal of stress from both everyday life and work. So, when we ask do people have spare time, we will say absolutely of course. People is human not only a robot. Then we question again, what kind of activity have you got when the spare time coming to an individual of course your answer can unlimited right. Then ever try this one, reading books. It can be your alternative with spending your spare time, the particular book you have read is definitely Green Solvents I: Properties and Applications in Chemistry.
