Natural Heritage: At the Interface of Nature and Culture

Natural Heritage: At the Interface of Nature and Culture

It has become more and more accepted that nature conservation is not possible without taking into account human activities. Thus an integrated approach to both the natural and cultural heritage is being encouraged and developed. Gathering a number of distinguished authors with diverse backgrounds (from a religious leader to academics to conservation scientists), the book aims to investigate the relationship between human beings and nature, between nature and culture.

Looking at nature as 'heritage' of the human race is a recognition both of the tremendous impacts (both positive and negative) that human activities have had on the natural environment, as well as the acceptance of human responsibility for managing our planet in a sustainable and sensitive manner.

The texts included examine this interface between human beings and nature in specific places (from the Everglades in Florida and Mont Saint Michel in Atlantic France, to the UK, Europe and the Mediterranean), as well as on a theoretical basis, and in the context of the international biodiversity conventions.
