'Showing how critical thinking and local democracy can be a spur to very real educational development within schools that are facing severe challenges, this book provides us with one very valuable contemporary resource of hope.'

*Ian Menter, Professor of Teacher Education, University of Oxford, UK*

*Teachers and Academic Partners in Urban Schools* identifies and addresses a major problem for practitioners – teachers, student teachers and teacher educators – working in urban schools burdened by highly restrictive teaching methods and pressures to meet unrealistic benchmarks set by government. In this book, Lori Beckett investigates how to negotiate these tensions and challenges and offers an account of how to elevate practitioners' professional voice on quality teaching along more democratic lines.

The book addresses key issues for teachers in urban schools, such as:

- fractures in teachers' professional communities;
- impacts of imposed marketizing policies and forced performative practices on schools;
- the complexities of teaching and teachers' concerns about practice, as well as teaching practitioners' perception of educational/schools policy.

Both academic and teacher partners contribute to the work, showcasing the ways they have engaged with each other in joint work and with local government. Through this, the book supports a professional and politicized dialogue about teaching and teacher education, offering a meaningful account of how to fashion a form of educative schooling for students and families with complex needs.

Written by a dynamic and experienced author, this book brings Beckett's experience to bear on a controversial and complex area – addressing the general trend towards increased regulatory policy in education. It is an essential read for anyone interested in a rich analysis of how practitioners can work to

reassert their professional voice and regain control of schools and teacher education, and will also appeal to those interested in the larger project of restoring school democracy.
