**Virtualism, Governance and Practice: Vision and Execution in Environmental Conservation (Environmental Anthropology and Ethnobiology)** James G. Carrier, Paige West

Many people investigating the operation of large-scale environmentalist organizations see signs of power, knowledge and governance in their policies and projects. This collection indicates that such an analysis appears to be justified from one perspective, but not from another. The chapters in this collection show that the critics, concerned with the power of these organizations to impose their policies in different parts of the world, appear justified when we look at environmentalist visions and at organizational policies and programs. However, they are much less justified when we look at the practical operation of such organizations and their ability to generate and carry out projects intended to reshape the world.
