## **Carboranes** Russell N. Grimes

Carboranes Second Edition is designed as a comprehensive source of information in a field that has experienced enormous growth in both its fundamental and applied aspects in the four decades since the publication of Carboranes (1970). During this long period thousands of original research papers have appeared, along with many review articles and book chapters dealing with aspects of carborane chemistry. As carborane science has grown in complexity, and applications have advanced steadily in areas such as medicine, nanostructured and electroactive materials, catalysis, polymers, and others, the need for a monograph covering the entire area in a unified treatment has become increasingly apparent. This volume has two principal objectives, the first of which is to provide a readable and concise introduction to the basic principles underlying the synthesis, structures, reactivity, and applications of carboranes and metallocarboranes at a level suitable for readers in industry and academe who are not trained in boron chemistry but find themselves working with, or lecturing about carboranes. Secondly, the book furnishes a trove of detailed information for workers active in carborane science and associated technologies. To that end, it incorporates tables listing thousands of specific compounds keyed to literature references (supplemented by additional information available on a website), together with more than 2,000 molecular structure drawings that illuminate the accompanying discussion. Thorough treatment of the synthesis, structures, and reactions of carboranes, heterocarboranes, and metallocarboranes in the first 13 chapters is followed by four chapters detailing advances in practical applications in polymer science, catalysis, medicine, and other areas.

- Includes over 2,000 molecular structure drawings throughout the text
- Features tables listing thousands of compounds with key literature references
- Extended and updated tables provided online via the book's website

### **From reader reviews:**

#### **Susan Roundy:**

The book with title Carboranes has lot of information that you can study it. You can get a lot of profit after read this book. That book exist new understanding the information that exist in this publication represented the condition of the world right now. That is important to yo7u to be aware of how the improvement of the world. This kind of book will bring you with new era of the glowbal growth. You can read the e-book on your smart phone, so you can read that anywhere you want.

#### **Erik Herrera:**

Often the book Carboranes has a lot details on it. So when you check out this book you can get a lot of benefit. The book was authored by the very famous author. The author makes some research prior to write this book. This book very easy to read you will get the point easily after reading this book.

#### **Wanda Holmes:**

You may get this Carboranes by look at the bookstore or Mall. Merely viewing or reviewing it can to be your solve trouble if you get difficulties on your knowledge. Kinds of this book are various. Not only by simply written or printed and also can you enjoy this book by simply e-book. In the modern era such as now, you just looking of your mobile phone and searching what your problem. Right now, choose your own personal ways to get more information about your publication. It is most important to arrange you to ultimately make your knowledge are still change. Let's try to choose correct ways for you.

#### **Ashley Robinette:**

A number of people said that they feel uninterested when they reading a e-book. They are directly felt it when they get a half elements of the book. You can choose the book Carboranes to make your own personal reading is interesting. Your current skill of reading talent is developing when you similar to reading. Try to choose simple book to make you enjoy to see it and mingle the sensation about book and looking at especially. It is to be 1st opinion for you to like to available a book and read it. Beside that the guide Carboranes can to be your brand new friend when you're sense alone and confuse in what must you're doing of that time.
