## **Decision Modelling for Health Economic Evaluation (Handbooks in Health Economic Evaluation)**

Andrew Briggs, Mark Sculpher, Karl Claxton

In financially constrained health systems across the world, increasing emphasis is being placed on the ability to demonstrate that health care interventions are not only effective, but also cost-effective. This book deals with decision modelling techniques that can be used to estimate the value for money of various interventions including medical devices, surgical procedures, diagnostic technologies, and pharmaceuticals. Particular emphasis is placed on the

importance of the appropriate representation of uncertainty in the evaluative process and the implication this uncertainty has for decision making and the need for future research.

This highly practical guide takes the reader through the key principles and approaches of modelling techniques. It begins with the basics of constructing different forms of the model, the population of the model with input parameter estimates, analysis of the results, and progression to the holistic view of models as a valuable tool for informing future research exercises. Case studies and exercises are supported with online templates and solutions.

This book will help analysts understand the contribution of decision-analytic modelling to the evaluation of health care programmes.

**ABOUT THE SERIES:** Economic evaluation of health interventions is a growing specialist field, and this series of practical handbooks will tackle, in-depth, topics superficially addressed in more general health economics books. Each volume will include illustrative material, case histories and worked examples to encourage the reader to apply the methods discussed, with supporting material provided online. This series is aimed at health economists in academia, the pharmaceutical industry and the health sector, those on advanced health economics courses, and health researchers in associated fields.

### **From reader reviews:**

#### **Alicia Gentry:**

This Decision Modelling for Health Economic Evaluation (Handbooks in Health Economic Evaluation) are reliable for you who want to be described as a successful person, why. The reason why of this Decision Modelling for Health Economic Evaluation (Handbooks in Health Economic Evaluation) can be one of the great books you must have is giving you more than just simple examining food but feed you with information that perhaps will shock your prior knowledge. This book is handy, you can bring it almost everywhere and whenever your conditions both in e-book and printed types. Beside that this Decision Modelling for Health Economic Evaluation (Handbooks in Health Economic Evaluation) forcing you to have an enormous of experience such as rich vocabulary, giving you test of critical thinking that could it useful in your day activity. So , let's have it and luxuriate in reading.

#### **Gabriel Harris:**

The publication with title Decision Modelling for Health Economic Evaluation (Handbooks in Health Economic Evaluation) contains a lot of information that you can study it. You can get a lot of benefit after read this book. That book exist new understanding the information that exist in this publication represented the condition of the world now. That is important to yo7u to know how the improvement of the world. That book will bring you in new era of the the positive effect. You can read the e-book with your smart phone, so you can read that anywhere you want.

#### **Teresa Burns:**

Are you kind of active person, only have 10 or perhaps 15 minute in your time to upgrading your mind ability or thinking skill also analytical thinking? Then you are having problem with the book compared to can satisfy your short period of time to read it because this time you only find publication that need more time to be learn. Decision Modelling for Health Economic Evaluation (Handbooks in Health Economic Evaluation) can be your answer mainly because it can be read by anyone who have those short spare time problems.

#### **Robert Knight:**

The book untitled Decision Modelling for Health Economic Evaluation (Handbooks in Health Economic Evaluation) contain a lot of information on the item. The writer explains the woman idea with easy approach. The language is very simple to implement all the people, so do certainly not worry, you can easy to read that. The book was authored by famous author. The author will take you in the new period of time of literary works. It is easy to read this book because you can please read on your smart phone, or program, so you can read the book with anywhere and anytime. In a situation you wish to purchase the e-book, you can wide open their official web-site and also order it. Have a nice learn.
