Grid-connected Solar Electric Systems: The Earthscan Expert Handbook for Planning, Design and Installation Geoff Stapleton, Susan Neill

Solar electricity – or photovoltaics (PV) – is the world's fastest growing energy technology. It can be used on a wide variety of scales, from single dwellings to utility-scale solar farms providing power for whole communities. It can be integrated into existing electricity grids with relative simplicity, meaning that in times of low solar energy users can continue to draw power from the grid, while power can be fed or sold back into the grid at a profit when their electricity generation exceeds the amount they are using. The falling price of the equipment combined with various incentive schemes around the world have made PV into a lucrative low carbon investment, and as such demand has never been higher for the technology, and for people with the expertise to design and install systems.

This *Expert* handbook provides a clear introduction to solar radiation, before proceeding to cover:

- electrical basics and PV cells and modules
- inverters
- design of grid-connected PV systems
- system installation and commissioning
- maintenance and trouble shooting
- health and safety
- economics and marketing.

Highly illustrated in full colour throughout, this is the ideal guide for electricians, builders and architects, housing and property developers, home owners and DIY enthusiasts, and anyone who needs a clear introduction to grid-connected solar electric technology.

From reader reviews:

Gina Keller:

Information is provisions for those to get better life, information currently can get by anyone from everywhere. The information can be a expertise or any news even a concern. What people must be consider while those information which is in the former life are hard to be find than now is taking seriously which one works to believe or which one the particular resource are convinced. If you have the unstable resource then you understand it as your main information it will have huge disadvantage for you. All those possibilities will not happen inside you if you take Grid-connected Solar Electric Systems: The Earthscan Expert Handbook for Planning, Design and Installation as the daily resource information.

Paula Royce:

Reading can called brain hangout, why? Because if you are reading a book specially book entitled Grid-connected Solar Electric Systems: The Earthscan Expert Handbook for Planning, Design and Installation your thoughts will drift away trough every dimension, wandering in most aspect that maybe mysterious for but surely will end up your mind friends. Imaging each word written in a book then become one type conclusion and explanation which maybe you never get previous to. The Grid-connected Solar Electric Systems: The Earthscan Expert Handbook for Planning, Design and Installation giving you yet another experience more than blown away the mind but also giving you useful info for your better life in this particular era. So now let us explain to you the relaxing pattern this is your body and mind are going to be pleased when you are finished reading it, like winning a. Do you want to try this extraordinary spending spare time activity?

Stephen Comerford:

Do you have something that that suits you such as book? The e-book lovers usually prefer to pick book like comic, limited story and the biggest some may be novel. Now, why not trying Grid-connected Solar Electric Systems: The Earthscan Expert Handbook for Planning, Design and Installation that give your entertainment preference will be satisfied by simply reading this book. Reading behavior all over the world can be said as the method for people to know world better then how they react when it comes to the world. It can't be explained constantly that reading addiction only for the geeky person but for all of you who wants to end up being success person. So , for all of you who want to start looking at as your good habit, you could pick Grid-connected Solar Electric Systems: The Earthscan Expert Handbook for Planning, Design and Installation become your own starter.

George Jamison:

Reading a book to get new life style in this calendar year; every people loves to study a book. When you study a book you can get a great deal of benefit. When you read guides, you can improve your knowledge, since book has a lot of information into it. The information that you will get depend on what types of book

that you have read. If you need to get information about your research, you can read education books, but if you act like you want to entertain yourself you can read a fiction books, such us novel, comics, as well as soon. The Grid-connected Solar Electric Systems: The Earthscan Expert Handbook for Planning, Design and Installation will give you new experience in reading a book.
