A Text Book on GPS Surveying

Dr. Jayanta Kumar Ghosh Ph.D.

A Text Book on GPS Surveying Dr. Jayanta Kumar Ghosh Ph.D.

The objective of this book is to provide insights into understanding GPS Surveying and positioning concisely in a systematic manner. The book contains six chapters, one annexure followed by bibliography. The first chapter aims at introducing Global Positioning System (GPS) for land surveying. It starts with a brief history of development of NAVSTAR (NAVigational System for Timing And Ranging) GPS followed by advantages of GPS in land surveying and principle of positioning using GPS. The chapter concludes with an overview of elements of GPS in surveying and positioning. The objective of Chapter 2 is to provide basic information about GPS for surveying. It starts with architecture of GPS followed by contents of GPS signal, GPS system time. It discusses the World Geodetic System 1984 (WGS84) explaining its coordinate system, geoid, ellipsoid, earth gravitational model etc followed by its relationships with other geodetic systems. The chapter also discusses on GPS augmentation systems and modernization steps. Chapter 3 aims at providing fundamental information required for GPS surveying. The chapter explains the different methods for GPS surveying, equipments, field operations and quality analysis of GPS observations. The chapter concludes with accuracy standards to be followed for GPS surveying. Aim of chapter 4 is to explain the content of GPS observations. It discusses the GPS observables and fundamental relations to determine unknown positions. It also provides the different errors associated with observations. The chapter concludes with criterion for assessment of quality of GPS Observables. Chapter 5 discusses processing steps involved in determination of positions from GPS observables. It explains the operations involved in pre-processing and positioning followed by criterion for assessment of GPS positions. The chapter concludes with a brief discussion on salient modules of a GPS data processing software. Chapter 6 aims at locating GPS position geo-spatially through network adjustment. It discusses least square network adjustment models and methods, processing strategies, steps for network adjustments and criterion for output quality. The chapter concludes with a worked out example on network adjustment, as detailed theoretically. The book further contains one annexure stating the steps involved for conversion of navigation data to determine satellite positions in ECEF system. Towards the end, the book contains a list of books which have been referred in writing this book. Manuscript has been thoroughly checked through plagiarism software to avoid any copyright violation. However, to make the book more understandable, standard names and symbols have been used from original literatures. To summarize, the book provides a sequence of topics aiming to basic understanding and carrying out land surveying as well as processing for geo-spatial positioning using GPS. The book is meant to serve as an introductory text book on GPS surveying and is expected to be useful for students as well as field surveyors looking for insights into GPS surveying.

From reader reviews:

Marcia Fullerton:

In this 21st one hundred year, people become competitive in every single way. By being competitive now, people have to do something to make them survive, being in the middle of the actual crowded place and notice by simply surrounding. One thing that often many people have underestimated it for a while is reading. Yeah, by reading a guide your ability to survive boost then having chance to stay than other is high. For yourself who want to start reading the book, we give you this specific A Text Book on GPS Surveying book as basic and daily reading reserve. Why, because this book is greater than just a book.

Ryan Wysocki:

People live in this new moment of lifestyle always attempt to and must have the time or they will get wide range of stress from both daily life and work. So, if we ask do people have extra time, we will say absolutely indeed. People is human not really a robot. Then we inquire again, what kind of activity have you got when the spare time coming to you of course your answer will certainly unlimited right. Then do you try this one, reading ebooks. It can be your alternative with spending your spare time, the book you have read will be A Text Book on GPS Surveying.

Erica Logan:

A Text Book on GPS Surveying can be one of your beginner books that are good idea. We recommend that straight away because this e-book has good vocabulary that could increase your knowledge in words, easy to understand, bit entertaining however delivering the information. The article author giving his/her effort to set every word into enjoyment arrangement in writing A Text Book on GPS Surveying however doesn't forget the main position, giving the reader the hottest and also based confirm resource details that maybe you can be considered one of it. This great information can easily draw you into completely new stage of crucial contemplating.

Phil Garcia:

You may get this A Text Book on GPS Surveying by go to the bookstore or Mall. Just viewing or reviewing it can be your solve trouble if you get difficulties to your knowledge. Kinds of this book are various. Not only simply by written or printed but in addition can you enjoy this book by means of e-book. In the modern era just like now, you just looking by your local mobile phone and searching what their problem. Right now, choose your ways to get more information about your book. It is most important to arrange you to ultimately make your knowledge are still change. Let's try to choose suitable ways for you.
