# Computational Intelligence in Economics and Finance (Advanced Information Processing)

**Computational Intelligence in Economics and Finance (Advanced Information Processing)**

Due to the ability to handle specific characteristics of economics and finance forecasting problems like e.g. non-linear relationships, behavioral changes, or knowledge-based domain segmentation, we have recently witnessed a phenomenal growth of the application of computational intelligence methodologies in this field.

In this volume, Chen and Wang collected not just works on traditional computational intelligence approaches like fuzzy logic, neural networks, and genetic algorithms, but also examples for more recent technologies like e.g. rough sets, support vector machines, wavelets, or ant algorithms. After an introductory chapter with a structural description of all the methodologies, the subsequent parts describe novel applications of these to typical economics and finance problems like business forecasting, currency crisis discrimination, foreign exchange markets, or stock markets behavior.

**From reader reviews:**

**Ebony Lower:**

Now a day those who Living in the era exactly where everything reachable by talk with the internet and the resources inside it can be true or not need people to be aware of each data they get. How a lot more to be smart in getting any information nowadays? Of course the solution is reading a book. Examining a book can help persons out of this uncertainty Information particularly this Computational Intelligence in Economics and Finance (Advanced Information Processing) book as this book offers you rich info and knowledge. Of course the knowledge in this book hundred per-cent guarantees there is no doubt in it you may already know.

**Vicki Escalante:**

Your reading sixth sense will not betray a person, why because this Computational Intelligence in Economics and Finance (Advanced Information Processing) publication written by well-known writer we are excited for well how to make book which can be understand by anyone who also read the book. Written within good manner for you, leaking every ideas and producing skill only for eliminate your hunger then you still question Computational Intelligence in Economics and Finance (Advanced Information Processing) as good book not only by the cover but also by the content. This is one publication that can break don't assess book by its cover, so do you still needing yet another sixth sense to pick this kind of!? Oh come on your looking at sixth sense already told you so why you have to listening to a different sixth sense.

**John Cheung:**

Is it anyone who having spare time and then spend it whole day by watching television programs or just telling lies on the bed? Do you need something totally new? This Computational Intelligence in Economics and Finance (Advanced Information Processing) can be the reply, oh how comes? A fresh book you know. You are thus out of date, spending your spare time by reading in this brand new era is common not a geek activity. So what these textbooks have than the others?

**Christina Almonte:**

Don't be worry when you are afraid that this book will filled the space in your house, you will get it in e-book method, more simple and reachable. This specific Computational Intelligence in Economics and Finance (Advanced Information Processing) can give you a lot of close friends because by you investigating this one book you have thing that they don't and make anyone more like an interesting person. This specific book can be one of one step for you to get success. This reserve offer you information that perhaps your friend doesn't realize, by knowing more than various other make you to be great people. So , why hesitate? Let's have Computational Intelligence in Economics and Finance (Advanced Information Processing).
