Library collection management is a vital part of any library's operations. Making a Collection Count takes a holistic look at library collection management, connecting collection management activities and departments, and instructs on how to gather and analyse data from each point in a collection's lifecycle. Relationships between collections and other library services are also explored. The result is a quality collection that is clean, current, and useful. The second edition includes expanded information on collection metrics, digital collections, and practical advice for managing collections efficiently when time and resources are tight. It also includes more real-life examples from practicing librarians in areas such as workflow analysis, collection budgets, and collection management techniques. Chapters cover the life cycle of a collection, understanding workflow and collecting metrics. Physical inventory, collection objectives and bookmarks, as well as collection organization, collection budgets and marketing collections are also discussed.

- Focuses on collection quality
- Offers practical applications for collection librarians and managers
- Relevant for different library types: public, academic, school, and special
