Reflow Soldering Processes Ning-Cheng Lee

Focused on technological innovations in the field of electronics packaging and production, this book elucidates the changes in reflow soldering processes, its impact on defect mechanisms, and, accordingly, the troubleshooting techniques during these processes in a variety of board types. Geared toward electronics manufacturing process engineers, design engineers, as well as students in process engineering classes, Reflow Soldering Processes and Troubleshooting will be a strong contender in the continuing skill development market for manufacturing personnel.

Written using a very practical, hands-on approach, Reflow Soldering Processes and Troubleshooting provides the means for engineers to increase their understanding of the principles of soldering, flux, and solder paste technology. The author facilitates learning about other essential topics, such as area array packages--including BGA, CSP, and FC designs, bumping technique, assembly, and rework process,--and provides an increased understanding of the reliability failure modes of soldered SMT components. With cost effectiveness foremost in mind, this book is designed to troubleshoot errors or problems before boards go into the manufacturing process, saving time and money on the front end. The author's vast expertise and knowledge ensure that coverage of topics is expertly researched, written, and organized to best meet the needs of manufacturing process engineers, students, practitioners, and anyone with a desire to learn more about reflow soldering processes. Comprehensive and indispensable, this book will prove a perfect training and reference tool that readers will find invaluable.

Provides engineers the cutting-edge technology in a rapidly changing field

Offers in-depth coverage of the principles of soldering, flux, solder paste technology, area array packages--including BGA, CSP, and FC designs, bumping technique, assembly, and the rework process

Teressa Fernandez:

Now a day folks who Living in the era wherever everything reachable by interact with the internet and the resources inside it can be true or not call for people to be aware of each information they get. How individuals to be smart in having any information nowadays? Of course the reply is reading a book. Looking at a book can help men and women out of this uncertainty Information specifically this Reflow Soldering Processes book as this book offers you rich info and knowledge. Of course the information in this book hundred % guarantees there is no doubt in it everybody knows.

Gabrielle Ponds:

Information is provisions for individuals to get better life, information nowadays can get by anyone from everywhere. The information can be a know-how or any news even a problem. What people must be consider while those information which is within the former life are challenging be find than now could be taking seriously which one works to believe or which one the particular resource are convinced. If you get the unstable resource then you obtain it as your main information you will have huge disadvantage for you. All those possibilities will not happen with you if you take Reflow Soldering Processes as the daily resource information.

Kenny Hardy:

Spent a free time to be fun activity to do! A lot of people spent their leisure time with their family, or their friends. Usually they doing activity like watching television, gonna beach, or picnic within the park. They actually doing ditto every week. Do you feel it?
