Visual and Spatial Analysis: Advances in Data Mining, Reasoning, and Problem Solving

Visual and Spatial Analysis: Advances in Data Mining, Reasoning, and Problem Solving

Advanced visual analysis and problem solving has been conducted successfully for millennia. The Pythagorean Theorem was proven using visual means more than 2000 years ago. In the 19th century, John Snow stopped a cholera epidemic in London by proposing that a specific water pump be shut down. He discovered that pump by visually correlating data on a city map. The goal of this book is to present the current trends in visual and spatial analysis for data mining, reasoning, problem solving and decision-making. This is the first book to focus on visual decision making and problem solving in general with specific applications in the geospatial domain - combining theory with real-world practice. The book is unique in its integration of modern symbolic and visual approaches to decision making and problem solving. As such, it ties together much of the monograph and textbook literature in these emerging areas.

This book contains 21 chapters that have been grouped into five parts: (1) visual problem solving and decision making, (2) visual and heterogeneous reasoning, (3) visual correlation, (4) visual and spatial data mining, and (5) visual and spatial problem solving in geospatial domains. Each chapter ends with a summary and exercises.

The book is intended for professionals and graduate students in computer science, applied mathematics, imaging science and Geospatial Information Systems (GIS). In addition to being a state-of-the-art research compilation, this book can be used a text for advanced courses on the subjects such as modeling, computer graphics, visualization, image processing, data mining, GIS, and algorithm analysis.

From reader reviews:

Christopher Patton:

Why don't make it to become your habit? Right now, try to prepare your time to do the important take action, like looking for your favorite book and reading a publication. Beside you can solve your problem; you can add your knowledge by the e-book entitled Visual and Spatial Analysis: Advances in Data Mining, Reasoning, and Problem Solving. Try to make book Visual and Spatial Analysis: Advances in Data Mining, Reasoning, and Problem Solving as your friend. It means that it can being your friend when you experience alone and beside regarding course make you smarter than ever before. Yeah, it is very fortunated to suit your needs. The book makes you a lot more confidence because you can know every thing by the book. So , let me make new experience and knowledge with this book.

Santa McNabb:

Do you one of people who can't read pleasant if the sentence chained inside the straightway, hold on guys this aren't like that. This Visual and Spatial Analysis: Advances in Data Mining, Reasoning, and Problem Solving book is readable by you who hate those perfect word style. You will find the details here are arrange for enjoyable examining experience without leaving perhaps decrease the knowledge that want to provide to you. The writer associated with Visual and Spatial Analysis: Advances in Data Mining, Reasoning, and Problem Solving content conveys thinking easily to understand by lots of people. The printed and e-book are not different in the content but it just different by means of it. So , do you nevertheless thinking Visual and Spatial Analysis: Advances in Data Mining, Reasoning, and Problem Solving is not loveable to be your top list reading book?

Gloria Wells:

Often the book Visual and Spatial Analysis: Advances in Data Mining, Reasoning, and Problem Solving will bring you to the new experience of reading a new book. The author style to spell out the idea is very unique. In case you try to find new book to read, this book very appropriate to you. The book Visual and Spatial Analysis: Advances in Data Mining, Reasoning, and Problem Solving is much recommended to you to see. You can also get the e-book through the official web site, so you can easier to read the book.

Joseph Rankins:

Playing with family in a very park, coming to see the marine world or hanging out with friends is thing that usually you may have done when you have spare time, then why you don't try thing that really opposite from that. Just one activity that make you not sensation tired but still relaxing, trilling like on roller coaster you already been ride on and with addition of information. Even you love Visual and Spatial Analysis: Advances in Data Mining, Reasoning, and Problem Solving, it is possible to enjoy both. It is very good combination right, you still desire to miss it? What kind of hangout type is it? Oh come on its mind hangout fellas. What? Still don't understand it, oh come on its named reading friends.
