**Investigative and Forensic Interviewing: A Personality-focused Approach** Craig N. Ackley, Shannon M. Mack, Kristen Beyer, Philip Erdberg

**Investigative and Forensic Interviewing: A Personality-Focused Approach** looks at the personality styles most commonly encountered in the criminal justice system and demonstrates how to use this insight to plan and conduct a productive interview. The book includes chapters on narcissistic, antisocial, psychopathic, borderline, inadequate/immature, paranoid, and schizotypal personalities. Written by forensic psychologists and former FBI investigators, each chapter begins with a vignette that displays the personality of an interviewee investigators might encounter in a forensic setting and then covers:

- Descriptions of how each personality style views him or herself and the world, and how these views lead to problematic behavior
- Ways to indirectly assess a subject through interviews with associated others, and through review of records
- Behaviors investigators are likely to encounter during the interview, and responses those behaviors may provoke
- Clues garnered from nonverbal behavior, including eye contact, facial expressions, and posture
- What type of questions to ask, and how to ask them

Finally, each chapter applies all of this information to an actual interview based on the opening vignette. This book is not for diagnosing personality disorders, but rather exists to help forensic interviewers understand the core traits that influence people's responsiveness. This personality-focused approach is helpful for professionals in a variety of areas including police, attorneys, parole officers, mental health workers, and others who interview witnesses, suspects, and offenders throughout the criminal justice system.
