For many high school graduates, college is a way to get ahead, but going to college is not the only way for young adults to succeed. Many people choose to enter the workforce after high school to start earning money and gaining experience right away. These motivated young workers can have rewarding jobs without ever having to earn a 4-year college degree. If you're interested in green energy and don't know that you want to—or can—go to college, a career in new energy markets might be for you. Young people need only a high school diploma or equivalent to start work in many new energy fields, and they can eventually earn more than \$50,000 a year. In *Energizing Energy Markets: Clean Coal, Shale, Oil, Wind, Solar*, you'll learn how to start a career in energy and what you need to succeed in the changing industry. Find out about the prospects for energy careers in the future, how much energy workers can make each year, and whether your path to success includes a career in new energy markets like wind, solar, and natural gas.
