# Fixed-Point Signal Processing (Synthesis Lectures on Signal Processing)

Wayne T. Padgett, David V. Anderson

**Fixed-Point Signal Processing (Synthesis Lectures on Signal Processing)** Wayne T. Padgett, David V. Anderson

This book is intended to fill the gap between the "ideal precision" digital signal processing (DSP) that is widely taught, and the limited precision implementation skills that are commonly required in fixed-point processors and field programmable gate arrays (FPGAs). These skills are often neglected at the university level, particularly for undergraduates. We have attempted to create a resource both for a DSP elective course and for the practicing engineer with a need to understand fixed-point implementation. Although we assume a background in DSP, Chapter 2 contains a review of basic theory and Chapter 3 reviews random processes to support the noise model of quantization error. Chapter 4 details the binary arithmetic that underlies fixed-point processors and then introduces fractional format for binary numbers. Chapter 5 covers the noise model for quantization error and the effects of coefficient quantization in filters. Because of the numerical sensitivity of IIR filters, they are used extensively as an example system in both Chapters 5 and 6.

Fortunately, the principles of dealing with limited precision can be applied to a wide variety of numerically sensitive systems, not just IIR filters. Chapter 6 discusses the problems of product roundoff error and various methods of scaling to avoid overflow. Chapter 7 discusses limit cycle effects and a few common methods for minimizing them. There are a number of simple exercises integrated into the text to allow you to test your understanding. Answers to the exercises are included in the footnotes.

### **From reader reviews:**

#### **Steven Richardson:**

Why don't make it to become your habit? Right now, try to prepare your time to do the important work, like looking for your favorite reserve and reading a guide. Beside you can solve your trouble; you can add your knowledge by the e-book entitled Fixed-Point Signal Processing (Synthesis Lectures on Signal Processing). Try to make the book Fixed-Point Signal Processing (Synthesis Lectures on Signal Processing) as your good friend. It means that it can be your friend when you really feel alone and beside regarding course make you smarter than ever before. Yeah, it is very fortunate in your case. The book makes you a lot more confidence because you can know every thing by the book. So , we should make new experience in addition to knowledge with this book.

#### **James Labrecque:**

Do you consider one of people who can't read satisfying if the sentence chained inside straightway, hold on guys this aren't like that. This Fixed-Point Signal Processing (Synthesis Lectures on Signal Processing) book is readable simply by you who hate those perfect word style. You will find the info here are arranged for enjoyable reading experience without leaving actually decrease the knowledge that want to give to you. The writer involving Fixed-Point Signal Processing (Synthesis Lectures on Signal Processing) content conveys the idea easily to understand by many individuals. The printed and e-book are not different in the content material but it just different such as it. So , do you continue to thinking Fixed-Point Signal Processing (Synthesis Lectures on Signal Processing) is not loveable to be your top listing reading book?

#### **Brenda Moulton:**

The reserve with title Fixed-Point Signal Processing (Synthesis Lectures on Signal Processing) contains a lot of information that you can understand it. You can get a lot of gain after read this book. This specific book exists new know-how the information that exists in this publication represented the condition of the world today. That is important to you to find out how the improvement of the world. This specific book will bring you in new era of the the positive effect. You can read the e-book on your own smart phone, so you can read that anywhere you want.

#### **James Martin:**

In this age globalization it is important to someone to receive information. The information will make you to definitely understand the condition of the world. The condition of the world makes the information quicker to share. You can find a lot of recommendations to get information example: internet, paper, book, and soon. You can view that now, a lot of publisher which print many kinds of book. The actual book that recommended for your requirements is Fixed-Point Signal Processing (Synthesis Lectures on Signal Processing) this guide consist a lot of the information from the condition of this world now. This kind of book was represented how does the world has grown up. The language styles that writer require to explain it

is easy to understand. Often the writer made some analysis when he makes this book. Honestly, that is why this book appropriate all of you.
