The Neglect of Experiment Allan Franklin

What role have experiments played, and should they play, in physics? How does one come to believe rationally in experimental results? *The Neglect of Experiment* attempts to provide answers to both of these questions. Professor Franklin's approach combines the detailed study of four episodes in the history of twentieth century physics with an examination of some of the philosophical issues involved. The episodes are the discovery of parity nonconservation (or the violation of mirror symmetry) in the 1950s; the nondiscovery of parity nonconservation in the 1930s, when the results of experiments indicated, at least in retrospect, the symmetry violation, but the significance of those results was not realized; the discovery and acceptance of CP (combined parity-charge conjugations, paricle-antiparticle) symmetry; and Millikan's oil-drop experiment. Franklin examines the various roles that experiment plays, including its role in deciding between competing theories, confirming theories, and calling fo new theories. The author argues that one can provide a philosophical justification for these roles. He contends that if experiment plays such important roles, then one must have good reason to believe in experimental results. He then deals with deveral problems concerning such results, including the epistemology of experiment, how one comes to believe rationally in experimental results, the question of the influence of theoretical presuppositions on results, and the problem of scientific fruad. This original and important contribution to the study of the philosophy of experimental science is an outgrowth of many years of research. Franklin brings to this work more than a decade of experience as an experimental high-energy physicist, along with his significant contributions to the history and philosophy of science.

From reader reviews:

John Alfaro:

Have you spare time to get a day? What do you do when you have far more or little spare time? Yes, you can choose the suitable activity regarding spend your time. Any person spent their particular spare time to take a stroll, shopping, or went to typically the Mall. How about open as well as read a book eligible The Neglect of Experiment? Maybe it is for being best activity for you. You recognize beside you can spend your time with the favorite's book, you can more intelligent than before. Do you agree with their opinion or you have additional opinion?

Dennis Byrd:

Don't be worry in case you are afraid that this book may filled the space in your house, you may have it in e-book technique, more simple and reachable. That The Neglect of Experiment can give you a lot of pals because by you considering this one book you have thing that they don't and make anyone more like an interesting person. This book can be one of one step for you to get success. This reserve offer you information that might be your friend doesn't understand, by knowing more than various other make you to be great folks. So , why hesitate? Let us have The Neglect of Experiment.

Justin Perry:

You will get this The Neglect of Experiment by visit the bookstore or Mall. Only viewing or reviewing it can to be your solve problem if you get difficulties on your knowledge. Kinds of this e-book are various. Not only through written or printed and also can you enjoy this book by means of e-book. In the modern era such as now, you just looking because of your mobile phone and searching what your problem. Right now, choose your current ways to get more information about your publication. It is most important to arrange yourself to make your knowledge are still up-date. Let's try to choose correct ways for you.

Randal Gore:

What is your hobby? Have you heard in which question when you got students? We believe that that question was given by teacher to their students. Many kinds of hobby, All people has different hobby. So you know that little person including reading or as examining become their hobby. You should know that reading is very important along with book as to be the issue. Book is important thing to provide you knowledge, except your own teacher or lecturer. You get good news or update about something by book. Numerous books that can you choose to use be your object. One of them are these claims The Neglect of Experiment.
