Dynamical Systems: An International Symposium: v. 1

Dynamical Systems: An International Symposium: v. 1

Dynamical Systems: An International Symposium, Volume 1 contains the proceedings of the International Symposium on Dynamical Systems held at Brown University in Providence, Rhode Island, on August 12-16, 1974. The symposium provided a forum for reviewing the theory of dynamical systems in relation to ordinary and functional differential equations, as well as the influence of this approach and the techniques of ordinary differential equations on research concerning certain types of partial differential equations and evolutionary equations in general.

Comprised of 29 chapters, this volume begins with an introduction to some aspects of the qualitative theory of differential equations, followed by a discussion on the Lefschetz fixed-point formula. Nonlinear oscillations in the frame of alternative methods are then examined, along with topology and nonlinear boundary value problems. Subsequent chapters focus on bifurcation theory; evolution governed by accretive operators; topological dynamics and its relation to integral equations and non-autonomous systems; and non-controllability of linear time-invariant systems using multiple one-dimensional linear delay feedbacks. The book concludes with a description of sufficient conditions for a relaxed optimal control problem.

This monograph will be of interest to students and practitioners in the field of applied mathematics.

From reader reviews:

Frank Craver:

This Dynamical Systems: An International Symposium: v. 1 are generally reliable for you who want to be described as a successful person, why. The reason why of this Dynamical Systems: An International Symposium: v. 1 can be on the list of great books you must have is definitely giving you more than just simple studying food but feed an individual with information that might be will shock your previous knowledge. This book is definitely handy, you can bring it all over the place and whenever your conditions throughout the e-book and printed people. Beside that this Dynamical Systems: An International Symposium: v. 1 forcing you to have an enormous of experience such as rich vocabulary, giving you test of critical thinking that we realize it useful in your day action. So , let's have it and enjoy reading.

Henry Robinson:

This book untitled Dynamical Systems: An International Symposium: v. 1 to be one of several books in which best seller in this year, this is because when you read this e-book you can get a lot of benefit in it. You will easily to buy this book in the book store or you can order it by using online. The publisher with this book sells the e-book too. It makes you easier to read this book, since you can read this book in your Smart phone. So there is no reason to you personally to past this book from your list.

Ruth Aguilar:

The publication untitled Dynamical Systems: An International Symposium: v. 1 is the e-book that recommended to you to learn. You can see the quality of the publication content that will be shown to you actually. The language that author use to explained their way of doing something is easily to understand. The article writer was did a lot of investigation when write the book, hence the information that they share to you is absolutely accurate. You also will get the e-book of Dynamical Systems: An International Symposium: v. 1 from the publisher to make you more enjoy free time.

Eva Lynch:

Reading a reserve make you to get more knowledge from it. You can take knowledge and information from a book. Book is created or printed or highlighted from each source that filled update of news. With this modern era like now, many ways to get information are available for an individual. From media social such as newspaper, magazines, science publication, encyclopedia, reference book, story and comic. You can add your knowledge by that book. Ready to spend your spare time to open your book? Or just in search of the Dynamical Systems: An International Symposium: v. 1 when you necessary it?
